Prostate Cancer Brief

Kiyana Khadivfard
Pola Zurek

The Audios

1.02-1.34:

Cancer is one of those subjects where our people don't want to talk about , they feel as though it's a death sentence
They feel as when you get cancer you hit a brick wall.
Many treatments and options available.
The earlier the diagnosis the earlier you make into recovery.

1.45-1.51

Cancer is a subject that puts people into shock especially men , some men hide away
Some pretend it doesn't exist .
If you sit and procrastinate then maybe you could have done something to stop cancer from spreading.

4.27-4.41

We don't even want to take that word into our mouths because it means death. Cancer is a word where u say its a big C etc but you don't say cancer.
Even those who have been through the journey they are still scared of saying that word.

5.20-5.40

Cancer is not a devil. What it is is there are cures for cancer and we have to explain that more and more I think so people lose this fear , its fear really I think .with this thing.
Not even wanting to take it into their mouths , that's the magnitude of fear which they have.

32.30-32.47

Basically if we want to be taken care of health wise then I think we have to embrace the NHS , I personally am so happy that I ma living in this country right now and not in the Caribbean's because I wouldn't probably be here .

54.03-54.27

Only those who neglected it to the end , but even even when u go its in the advanced stage you can still do something about it so there's no reason to hang on and wait and all if that , get the test and then you can sleep at night.

These were all the audios that were chosen to be picked out from the 52 mins , we needed to pick 2 to make 60s.

The chosen audios

1.02-1.34

5.20-5.40:

1) Cancer is one of those subjects where out people don't want to talk about, they feel as though it's a death sentence

2) They feel as when you get cancer you hit a brick wall

3) It's fear really i think with this thing

4) Not even wanting to take it into their mouths, that's the magnitude of fear which they have

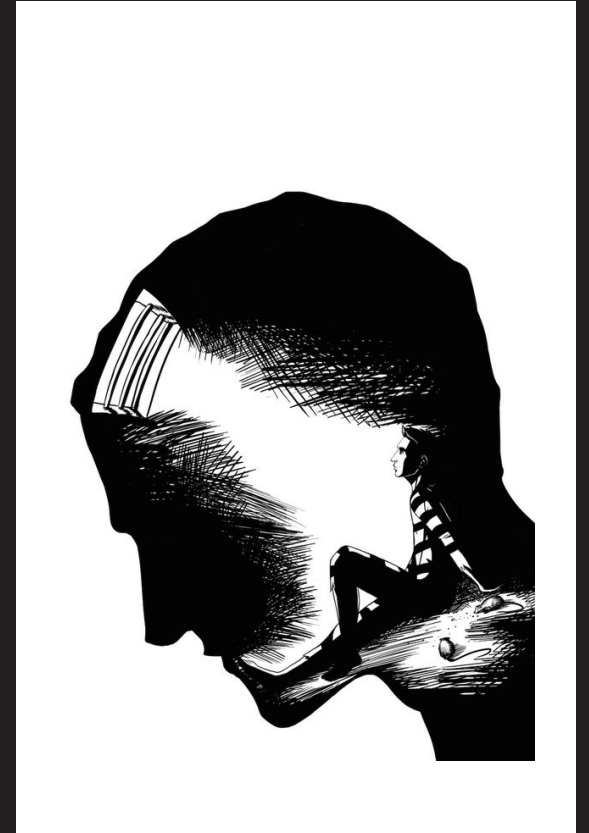

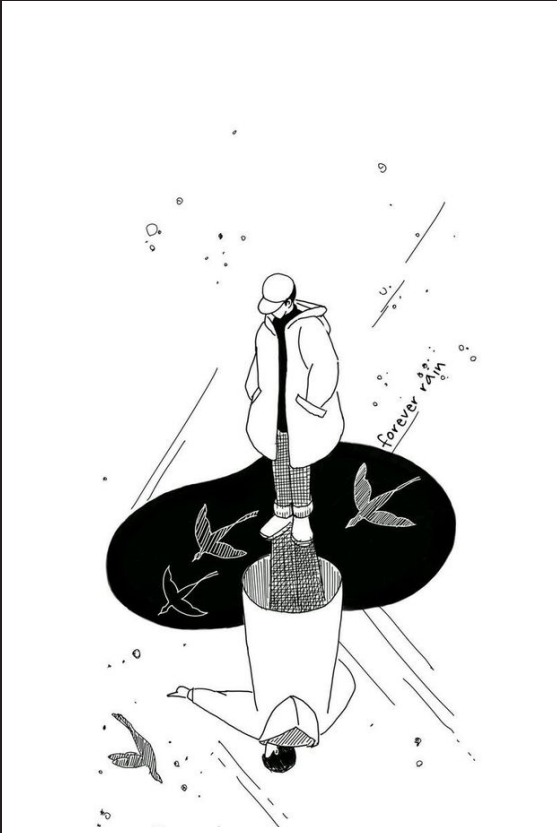

5) Cancer is not a devil. what it is is there are cures for cancer and we have to explain that more an more i think so people loose this fear,

6) Many treatments and options available

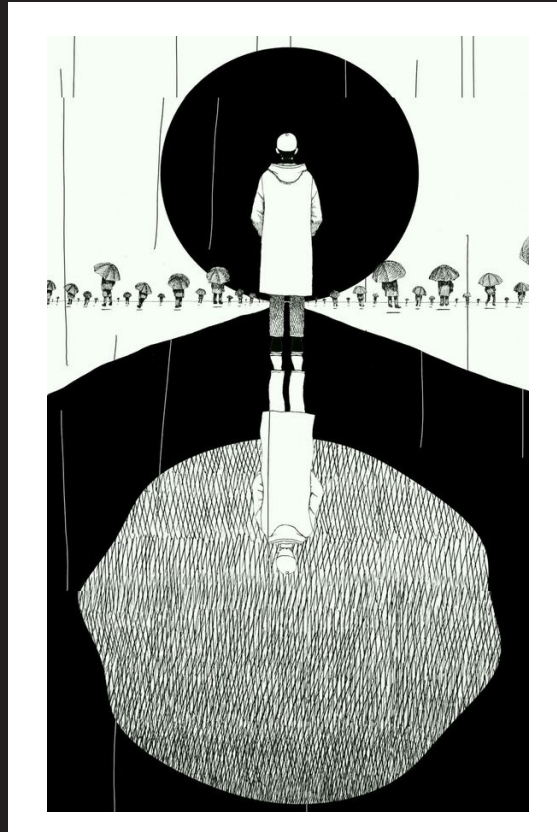

7) The earlier the diagnosis the earlier you make into recovery

Rearranged into chronicle order of how we want the storyline to look.
